## DETAILED ACTION

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-23, drawn to an ink jet medium, classified in class 428, subclass 195.
- II. Claims 24-31, drawn to an imaging process, classified in class 347, subclass 105.The inventions are distinct, each from the other because of the following reasons:
- 2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in another, materially different process, e.g., in a method of gift wrapping.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 4. In the event that the invention of Group I is chosen, this application contains claims directed to the following patentably distinct species of the claimed invention:
  - a. A medium for receiving ink comprising a support bearing a predetermined array (claims 1-6, 10 and 20-23);
  - b. A medium for receiving ink comprising a support bearing a predetermined array, wherein the cells are bonded to a hydrophilic layer (claim 7);

Application/Control Number: 10/045,686

Art Unit: 1774

c. A medium for receiving ink comprising a support bearing a predetermined array, wherein the cells are bonded to a hydrophobic layer (claims 8-9);

- d. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a UV absorber comprising a triazine derivative (claims 11-12)
- e. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a UV absorber comprising a hindered amine derivative (claims 11 and 13);
- f. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a UV absorber comprising a triazole derivative (claims 11 and 14);
- g. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a UV absorber comprising a phenone derivative (claims 11 and 15);
- h. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a UV absorber comprising a free radical quencher (claim 16);
- i. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a colorant stabilizer (claim 17);
- j. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a pigment stabilizer (claim 18); or

Application/Control Number: 10/045,686

Art Unit: 1774

k. A medium for receiving ink comprising a support bearing a predetermined array, wherein the hydrophobic walls comprise a dye stabilizer (claim 19).

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Page 5

Application/Control Number: 10/045,686

Art Unit: 1774

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the 7.

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael E. Grendzynski whose telephone number is 703-305-

0593. The examiner can normally be reached on weekdays, from 9:00 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Cynthia Kelly can be reached on 703-308-0449. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-305-5408 for regular

communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-2351.
